www.theengineerjobs.co.uk

The online meeting place for Engineers & Technologists

What is The Engineer Online?

The Engineer Online incorporates two websites and reaches 150,000 job seekers and browsers each month. Our editorial website www.theengineer.co.uk allows our users to search both new and archived articles, whilst browsing the latest jobs filtered through our news pages. Our jobsite www.theengineerjobs.co.uk offers our job seekers a portal for the latest engineering jobs, enabling them to find your vacancies through determined search criteria.

The Engineer Online is the only engineering website in the market to reach both the job seeker and job browser, giving you the best chance of recruiting quickly and effectively online.

Why should I use The Engineer Online?

» Multi-Discipline

The online meeting place for all Engineers (Mechanical, Electrical, Electronic, Software, Chemical and Civil)

» Bespoke Packages

A choice of advertising options suits all budgets and time scales

» Career CV

View CVs for free and only pay for details of your ideal candidates

» Time Effective

Quick & easy to post a job resulting in a faster response

» Information Portal

By bringing engineers together through exchanging information and ideas, your vacancies are guaranteed to reach the proactive engineer

» A Trusted Reputation

As the online partner of The Engineer magazine, the website is trusted as the first choice for the latest engineering news and jobs

Further information

Asset Change Lead (Fixed term contract)
Macclesfield
c. £51k to £64k

The organisation:
Here at AstraZeneca, our 100-acre site in Macclesfield is host to major parts of our global Manufacturing and Supply, Development, Commercial and UK-specific functions. Home to a team of over 3,000 employees, we have actively developed its size, potential and complexity since its foundation in the 1960s. Today, it provides a vital link between R&D and sales and marketing, enabling manufacturing and supply teams to liaise with their peers in development to produce practical and innovative solutions. Supplying products for all of our therapy areas in 130 international markets, it certainly is the place where you can find a challenging career and continue your development.

The role:
Currently we're developing new blister packing lines, which will provide our business with a range of advantages and benefits. Your role will be to ensure this programme is an out-and-out success. You must quickly grasp the scope and size of the challenge and what we must do as a business to address it. Actively leading and coordinating our project teams, you'll ensure we reorganise then deploy our resources in the most effective and efficient manner possible, in order to meet this challenge. You must then lead the development and implementation of the strategy, providing guidance and direction to ensure that projects and project work packages deliver solutions that meet targets and are sustainable. And, at all times, you must make sure that appropriate resources are available within the asset work stream.
